

Shower Melts

Ingredients:

Ice cube tray
3 tablespoons of vapor rub
1 cup of corn starch
2 tablespoons of water
Mixing bowl
Blue and green food coloring (optional)

Instructions:

1. Place the vapor rub and corn starch in a bowl. Start to stir. The vapor rub will need some time to warm up before it meshes well into the corn starch. Just keep it moving and it will start to break down.
2. Add in the two tablespoons of water. Continue to mix. You want a thick paste to form. If the mixture needs more water, add a splash at a time. You don't want too much water and this is a good way to control how much you add.
